DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4, 6-13 are rejected under 35 U.S.C. 102(b) as being anticipated by King. The patent to King teaches structure as claimed including elevated desk with a work surface (A), storage surface(b), base (B2), peripheral wall (B1).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over King in view of Woy. The patent to King teaches structure substantially as claimed as discussed above including work surface and peripheral wall the only difference being that the structures are not transparent. However, the use of transparent structure to provide a display purpose is a matter of privacy desired. Further, the patent to Woy teaches the use of providing transparent structural surface to provide a display. It would have been obvious and well within the level of one having ordinary skill in the art to modify the structure of King to include transparent surfaces, as taught by Woy and within the level of ordinary skill in the art, thereby providing structure as claimed.

Claims 14-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over King in view of Woy as applied to the claims above, and further in view of Lamm. The patent to King in view of Woy teaches structure substantially as claimed including support structure the only difference being that the support does not include three legs. However, the patent to Lamm teaches the use of providing a particular number of supports to be old. It would have been obvious and well within the level of one having ordinary skill in the art to modify the structure of King to include three supporting structure, as taught by Lamm since such structures are conventional alternative supporting structure used in the same intended purpose, thereby providing structure as claimed.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to 8-33693, Meyer, Burkholder, Heck, Bridge,

Art Unit: 3637

Cooper, Gordon et al teach structure similar to applicant's. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
